AGENDA

01

CeraVe Brand Insights & Market Positioning

Mass-market dermatological positioning / SWOT analysis and growth opportunities

02

Core Consumer Profiles & Segmentation

Gen Z repair needs and changing consumption / Daily Maintenance and Advanced Repair segments

03

CeraCare Strategy Upgrade & End-to-End Experience

Skin Genius + Amap environmental insights / A redesigned journey toward science-based healthy living

04

CeraCare Implementation & Business Value

12-month phased rollout / Risk and data compliance / Key growth metrics and ROI

CeraVe: Mass-Market Dermatological Skincare

With medical R&D; expertise, a mature product portfolio and accessible pricing, CeraVe has established a differentiated position in China's RMB 100-range skin-barrier repair market: medical expertise x mass-market accessibility

Brand DNA

Medical Expertise

- Developed with dermatologists
 - ceramides x MVE delivery technology
 - brand positioning
 - price essential
 - Dermatological
- ### Accessible to Everyone
- Affordable pricing
 - reach"
 - for all skin types
 - Expert skincare within everyone's
 - Great value, transparent ingredients and formulas

Product Portfolio

Globally, the portfolio covers cleansing, moisturizing, repair, acne, baby care and sun protection. Mainland China offers core cleansers, moisturizers, barrier repair and acne products, meeting everyday skincare needs with dermatological expertise.

Core Product Strengths

China Market Position

FACIAL CLEANSERS	FACIAL MOISTURIZERS	BODY MOISTURIZERS	ACNE	HAIRCARE	BABY	SUNSCREEN	ANTI-AGING
Three ceramides x MVE technology for expert barrier repair				Focus on affordable skin-barrier repair			
Gentle formulas for all skin types, including sensitive skin				Serve sensitive and efficacy-focused skin			
A broad portfolio covering everyday skincare needs				Expertise at an accessible price			
RMB 100-range pricing brings expert skincare within reach				Build a mass-market dermatology identity			

SWOT: CeraVe's Internal Challenges & External Opportunities

CeraVe offers generous, affordable products and an established member ecosystem in China. Low brand awareness, intense ingredient competition and high churn in conventional skin-analysis tools call for sharper consumer insights and sustainable growth opportunities.

S Strengths

- Scientific expertise: 21 years of co-development with dermatologists. Three signature ceramides strengthen the natural skin barrier and reduce moisture loss.
- Complete portfolio: Cleansers, moisturizers, sunscreen and serums meet basic skincare needs.
- Exceptional value: Affordable, large-format products appeal to students and other value-conscious consumers.

O Opportunities

- Group support: L'Oréal's Skin Genius technology, extensive Chinese consumer database and established marketing capabilities support AI transformation.
- Member ecosystem: The existing WeChat mini program captures QR-code users across channels and holds rich member data for platform upgrades and precision engagement.
- Industry trends: Basic efficacy products lead; science-led and emotional skincare develop together.

W Weaknesses

- Limited awareness: Since entering China in 2019, CeraVe still has room to grow awareness and penetration relative to established local leaders such as Winona and Proya.
- Hard-to-communicate expertise: Strict Chinese advertising rules on skincare efficacy limit public promotion of many medical-grade ingredients and benefits.

T Threats

- AI commoditization: Without ongoing interaction, conventional AI skin analysis becomes a one-off traffic monetization tool, improving purchases but not relationships.
- Intense ingredient competition: Ceramide barrier repair is now an industry standard. Local and established competitors are eroding differentiation.

Next Step

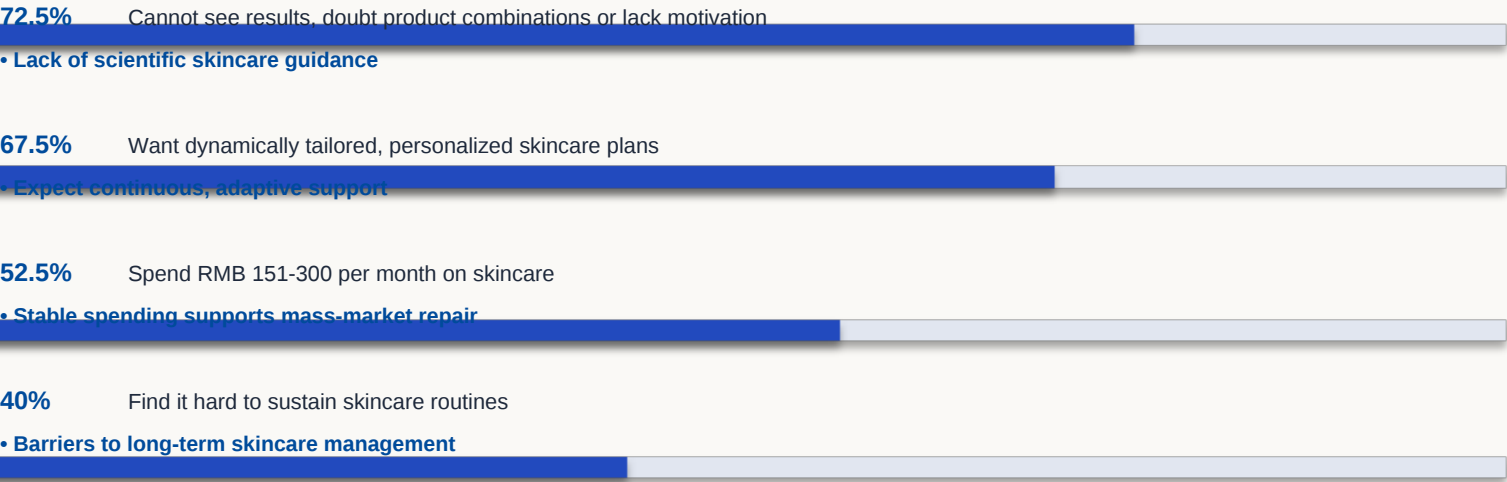

Cross-check survey findings with industry reports to identify high-growth segments, key skincare pain points and AI service use cases, guiding feature priorities and pilot-user selection.

Gen Z Consumer Profiles & Target Segments

Industry trends and early survey results show that younger consumers seek professional, scientific and long-term skin health management. As repair needs diversify, brands should evolve from individual repair products into long-term skin health partners.

Survey Findings

*40 valid responses; 70% of respondents aged 18-35.

Changing Consumption Patterns

Broader Repair Needs

Occasional repair → everyday skin health
As efficacy skincare becomes mainstream, repair becomes an everyday need.

More Precise Choices

Influencer-led choices → personalized science
Consumers seek accurate product matching within mid-range budgets.

Expanded Brand Value

One-off purchase → ongoing health support
Consumers expect continuing guidance and adaptive, personalized care.

Consumer needs are shifting from buying products to managing skin health. should extend from products to long-term health management.

Brand value

Target Consumers

Two core consumer groups show the strongest growth potential based on differing needs.

01 Daily Maintenance

Scale segment | Ages 18-25

- Who: Students, early-career professionals and skincare beginners.
- Needs: Basic hydration and barrier stability; affordable solutions for mild issues.
- Spending: Limited budgets, lower basket value and steady repeat purchases.

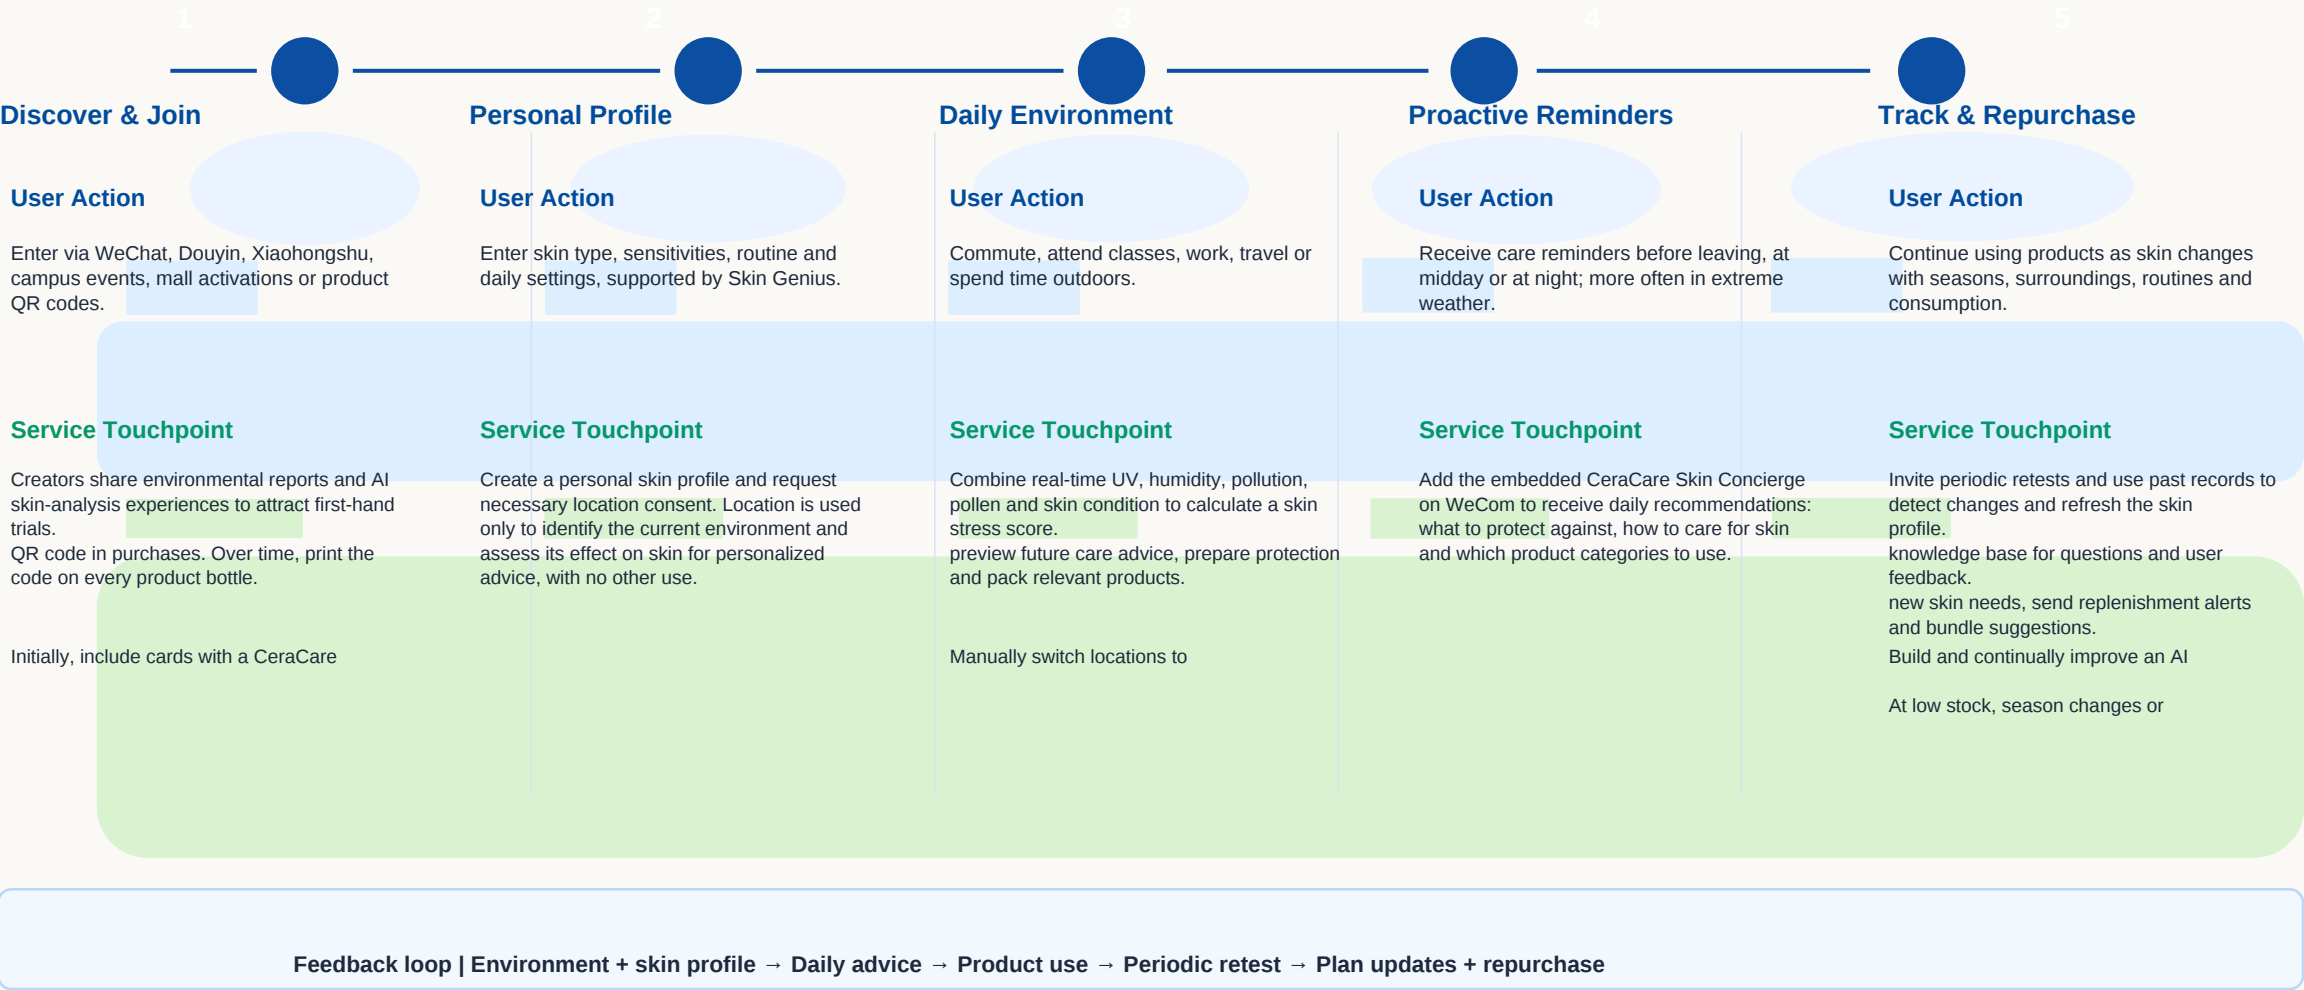

02 Advanced Repair

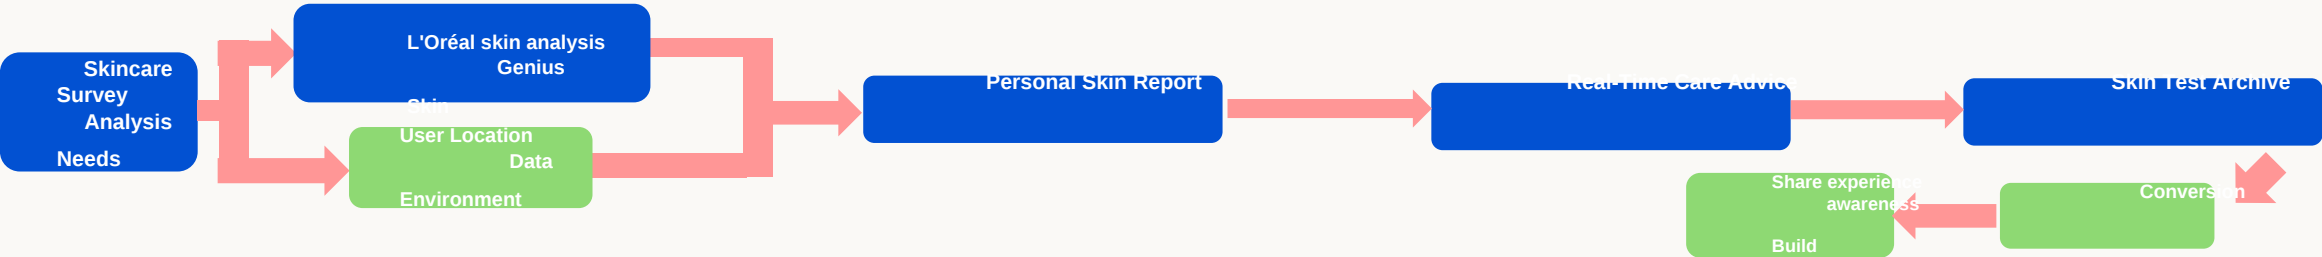

Value segment | Ages 25-35

- Who: Urban professionals, users of light aesthetic treatments and ingredient enthusiasts.
- Needs: Aftercare for acids/treatments, persistent issue management and safe expert guidance.
- Spending: Higher budgets; willing to pay for expertise, effective combinations and lasting results.

Strategic Positioning & Consumer Journey

A world-first combination of map-based weather data and AI skin analysis turns product sales into an AI daily-care partnership. By understanding the environment and skin condition in everyday settings, CeraCare proactively identifies skin stress, offers care advice and supports long-term repurchase.

CeraCare Mini Program: Phased Rollout

Move from tool launch to lasting consumer relationships through technology development, targeted testing, public launch and habit formation.

Months 3-6 plateau: refine the AI knowledge base and adjust reminder frequency.

Note: Adjust timing based on API tests, campaign feedback and platform performance.

Phases & Core Tasks

12-Month Rollout

Technology Development Oct-Nov

Integrate Amap LBS/weather APIs with Skin Genius data to deliver adaptive, customized repair plans.

02

Targeted Testing Dec-Feb

Invite highly engaged members, including Graduate and Senior tiers, to beta-test features and experience.

03

Public Launch + Campus Tour Mar-Jun

Open CeraCare to the public; partner with celebrities and creators, plus offline campus-tour activations.

04

Retention & Habits Jul-Sep

Encourage social UGC, run themed online/offline campaigns and continually improve the technology.

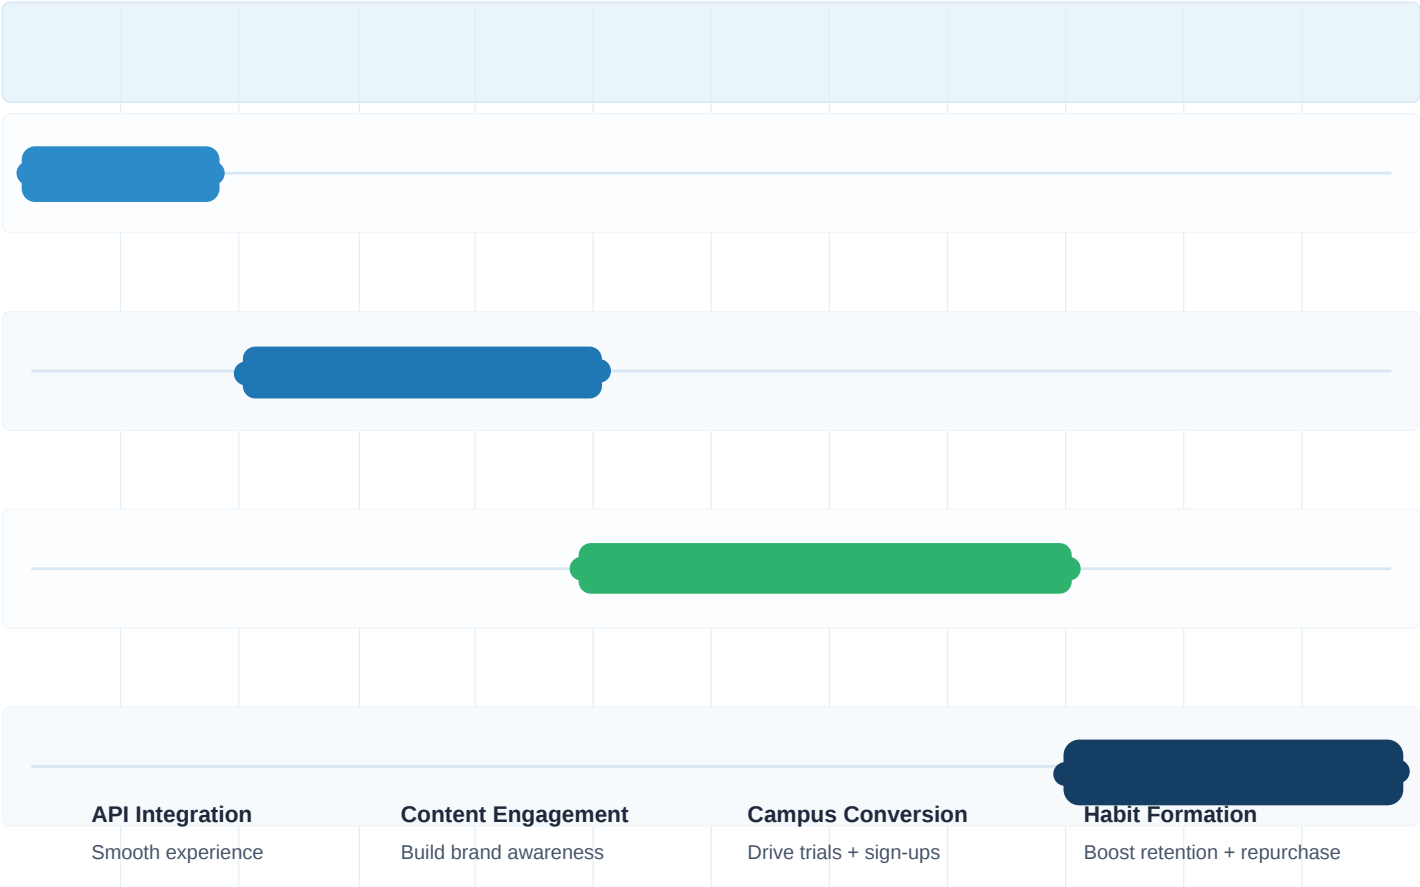

*Phase 03 channels: Weibo, WeChat Channels, Douyin and Xiaohongshu.

*Combine Amap location data with environmental information to assess local impacts on skin.

01

Overall Goal

Oct Nov Dec Jan Feb Mar Apr May Jun Jul Aug Sep

Connect consumer value with commercial growth through AI-personalized care, with compliance and manageable risk.

Cross-Border Data Compliance

As a French company, L'Oréal must comply with EU and Chinese data protection laws.
daily settings and potentially location data.
personalized service with user privacy.

The service uses skin photos, care records,
Core issue: Balance

Recommended Actions

- 1 Collect, process and store data within China.
- 2 With Amap, retain only de-identified daily-setting tags.
- 3 Global teams access only anonymized, aggregated trend data.
- 4 Photos and locations are used solely for CeraVe services.

Goal: Trusted, privacy-friendly, sustainable

Risk priorities: Reuse the existing team; launch a lightweight MVP; build in compliance; validate ROI with core metrics.

Key Beneficiaries

Consumers

Practical daily advice with less ineffective trial and error.

CeraVe

Improve retention, repurchase and differentiation; connect directly with consumers, deepen loyalty and gather Chinese consumer data to support group growth.

Retail / E-commerce

Better product matching and conversion; increase basket value, repeat purchases and loyalty.

KOLs / Agencies

New content themes, experiences and collaboration opportunities.

CeraCare business value: First-hand needs data → Better portfolio and channel strategy → Stronger brand loyalty

Potential Resistance

Privacy-Sensitive Users

May reject the service over ongoing tracking of photos and daily settings, marketing use or unclear consent.

Similar L'Oréal Brands

Concern over competition for resources, customer diversion, budgets and cannibalization within Dermatological Beauty.

Internal Finance / Sales

Short-term ROI may be unclear. Start quickly with a low-cost MVP and reuse the current team to reduce development costs. Show repurchase and LTV gains from frequent engagement.

Management focus: Clear consent eases privacy concerns | Brand boundaries reduce conflict | Validate ROI with MVP metrics, then scale investment.

Key metrics: Retention | Advice adoption | Retest completion | Repurchase | Basket value | NPS | Marketing ROI
